

## SwiftClock: Use Cases & Use Case Diagram

Author: Stephen Aranda

### Use Case 1

<b>Name</b>	Add/Remove Employee
<b>Identifier</b>	<u>CEN3073-33</u>
<b>Description</b>	Add/Remove employees from the database.
<b>Pre-Condition</b>	1. The Directors account is already created for use.
<b>Postcondition</b>	1. The Director shall be able to add or remove any employee from the database along with modifying their information.
<b>Basic Course of Action</b>	<ol style="list-style-type: none"><li>1. The use case begins when the Director wants to add or remove an employee to or from the system.</li><li>2. The system verifies the current database information of all employees in the system.</li><li>3. The Director enters the “Employees” tab where they will have the option of adding or removing.</li><li>4. The Director enters the employee’s credentials if adding.</li><li>5. The Director selects the employee that is to be removed if removing.</li><li>6. Use case ends.</li></ol>
<b>Alternate Course</b>	<p>A. The System is down for maintenance.</p> <p>A.1. The system enters the information that is to be added or removed into a queue.</p> <p>A.2. Once the system comes back online, the queued addition or removal will be put into effect.</p>

## Use Case 2

<b>Name</b>	Display Timecards
<b>Identifier</b>	<u>CEN3073-43</u>
<b>Description</b>	Display timecards for each employee in the company.
<b>Pre-Condition</b>	1. There are employees already within the system.
<b>Postcondition</b>	1. The system shall display the timecards for all employees in the database.
<b>Basic Course of Action</b>	<ol style="list-style-type: none"><li>1. The use case begins when the Director wants to view the employee's timecards or when an Employee wants to view their own timecard.</li><li>2. The system verifies the database information corresponding to the Director for all employees or to the single employee.</li><li>3. The system displays all the timecard credentials.</li><li>4. Use case ends.</li></ol>
<b>Alternate Course</b>	<p>A. The System does not have any employee timecards to display.</p> <p>A.1. The system determines that there are no available timecards.</p> <p>A.2. The system allows the user to add an employee, so the system has something to display.</p> <p>A.3. The system displays all the timecards credentials.</p>

### Use Case 3

<b>Name</b>	Generate Report
<b>Identifier</b>	<u>CEN3073-34</u>
<b>Description</b>	Generates selected report using the required information.
<b>Pre-Condition</b>	1. The Directors account is already created for use.
<b>Postcondition</b>	1. The Director shall be able to generate the selected report.
<b>Basic Course of Action</b>	<ol style="list-style-type: none"><li>1. The use case begins when the Director wants to generate a report for company use.</li><li>2. The Director navigates to the “Reports” tab.</li><li>3. The system verifies the selected report that is to be generated.</li><li>4. The system acquires the data needed to generate the selected report.</li><li>5. The system generates the report as a file that can be printed.</li><li>6. Use case ends.</li></ol>
<b>Alternate Course</b>	<p>A. The System does not acquire the required information for the report.</p> <p>A.1. An error message will appear for the Director to add any missing information for the report to be generated.</p> <p>A.2. The use cases continue from <u>step 4</u> from the basic course of action.</p>

## Use Case 4

<b>Name</b>	Display Calendar
<b>Identifier</b>	<u>CEN3073-35</u>
<b>Description</b>	Displays the Calendar for the Director and for the Employee for viewing.
<b>Pre-Condition</b>	<ol style="list-style-type: none"><li>1. The Directors account is already created for use.</li><li>2. The Employees account is already created for use.</li></ol>
<b>Postcondition</b>	<ol style="list-style-type: none"><li>1. The Director shall be able to view their calendar.</li><li>2. The Employee shall be able to view their calendar.</li></ol>
<b>Basic Course of Action</b>	<ol style="list-style-type: none"><li>1. The use case begins when the Director or Employee wants to view their respective calendar.</li><li>2. The Director or Employee navigates to the “Calendar” tab.</li><li>3. The system verifies the information that is to be displayed onto the calendar, such as upcoming events or work schedules.</li><li>4. The system displays those events or work schedules onto the calendar.</li><li>5. Use case ends.</li></ol>
<b>Alternate Course</b>	<p>A. The calendar displays outdated information.</p> <p>A.1. An error message will appear for the user, letting them know to refresh the program since it was updated recently.</p> <p>A.2. The user refreshes the page.</p> <p>A.3. The calendar is updated.</p> <p>A.2. The use cases continue from <u>step 3</u> from the basic course of action.</p>
